President's Perspective — Glenn Rodrick

I just want to thank everyone who volunteered for the fair.

We had so much help and it went so smoothly, it was unbelievable. From set up, to putting the club display together, assembling the Space Needle, the volunteers for the booth, giving kids rocks, and of course tear down.

Thank you again to everyone in the club for doing such a great job. We really do shine as a group and as a team.

The auction will be coming up toward the end of the month. There will be an email coming out with all the details so keep your eyes out for that. If you have any questions, please feel free to ask any of the board of directors.

And we are starting our Kids program back up at our October Business meeting. Thank you to Rebecca Hendrickson for making this happen.

Field Trip Report

October 17 – Jordan Creek (Marblemount)
Meeting place - 10:00AM at Marble Mountain Fish Hatchery Hwy 20
Hunting for – Listwanite and Jade
Tools you need - Rock hammer, rubber boots or waders, and a backpack/bucket for your treasures
Access - moderate terrain, ½ mile hike from hatchery
Additional items - lunch/snacks and water, water, water. Dress in layers. Be prepared for ticks/mosquitoes

November 21 – Twin Rivers (Joyce)
Meeting place - 10:00Aam Joyce General Store on Hwy 112
Hunting for – Concreations
Tools you need - Rock hammer, shovel, hammer, backpack/bucket for your treasures
Access - easy terrain, based on the tides
Additional items - lunch/snacks and water, water, water. Dress for wet weather in layers

Please remember that even though we love to meet new people, fieldtrips are a member benefit and part of your membership dues covers you for injury liability.
Though injuries are rare, and we do everything we can to avoid them, we are going out into nature, and uncontrollable environment.
All individuals attending field trips will have to sign a release of liability, and if you are bringing guests, we will try to entice them into join the club by having Membership applications available.

Nomination Committee Report

The nominating committee is publishing the recommendations for the 2027 club board as follows. The committee will be providing this information to all club members by email as well as newsletter. Nominees will be confirmed by the club at the October business meeting.

The nominating committee recommends the following club members for the 2027 Board of Directors.

President: Glenn Rodrick
Vice President: Dennis Batchelor
Secretary: Mary New
Treasurer: Jillian Higgins
Associations Director: Mark Baumann
1 Year Director: Brett Lawrence
2 Year Director: Richard Holl
1 Year Trustee: Wes Ames
2 Year Trustee: Paul Haak

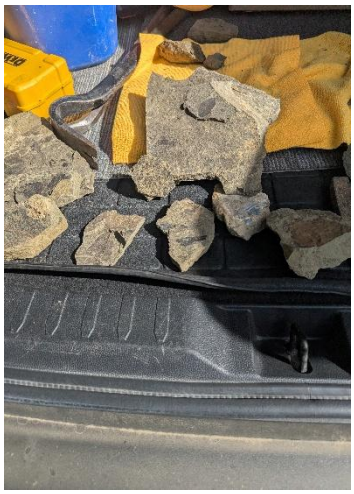
If you are interested in filling any of the position, please reach out to Glenn Rodrick at PVGAMC@gmail.com

Field Trip Recap — Paul Haak

The Little Naches trip was a great success. Around 20 people met us at the staging area before we drove out to our first stop, the geode location. We stayed there for about two hours, and everyone found great material—one hole in particular produced thunder eggs at an amazing pace.

Next, we moved on to the Lily Pad Jasper site, where we found nice, large chunks of jasper along with a ton of marble-sized geodes that will be great for tumbling. On the way back, we made our final stop alongside the road and found several leaf fossils.

It was a wonderful trip, filled with great finds and new friends.



Associations Director Report

Greetings and salutations my fellow rockhounds and pepplepups.

As I write this I am at our booth at the fair watching mother nature reminding us that fall has arrived. With rain, gusty winds and falling leaves she is making it obvious. It is time to start planning our indoor rock related activities.

All is quiet on both the federal and state level. I will be attending the Washington State Mineral Council's meeting on October 20th at the Maplewood Rock and Gem Club's clubhouse. The meeting starts at 7 pm and will be available via a Zoom link.

The last thing I have to report on is that the American Land Access Association is shutting down. The main reason is new laws have been put in place that raise the amount of money a 501(c)(4) must spend to maintain their lobbying credentials. Their board also feels that the public's interaction with them has been waning. All remaining monies will be turned over to the American Federation of Mineralogical Societies with the suggestion it be used conservation and legislative purposes.

Respectfully submitted by,
Mark Baumann
PVG&MC Associations Director

Clubhouse report — Wes Ames

The Clubhouse seems to be a bit slow this last month, maybe due to the WA State Fair going on.

At present we are using a lot of Trim Saw Blades, 3 in the last month and a half.

As a friendly reminder to everyone trim saws are only for straight cuts with the edge of the blade, not for shaping the rock piece with the side of the saw blade.

Volunteer Spotlight -

A huge thank you to everyone who volunteered for the WA State Fair. We were able to get all the volunteer spots filled with at least one member and many, many rocks were given out to happy children. A very large thank you to everyone who tumbled the stones we were able to give out.

SATURDAY, OCTOBER 3RD, CLUBHOUSE CLEANUP – WE WILL BE; ORGANIZING THE BARN AT THE CLUBHOUSE, WEEDWAKING, MOWING, CLEANING KITCHEN AND CABBING ROOM COUNTERS, VACUMING, ETC. There are options for everyone, so if any of these options look good to you, show up at 12:00am at the clubhouse and help us keep it nice for everyone who uses it. There are opportunities for every ability and person so please don't think there is nothing you can do. All help is appreciated.

Crystal Healing: Toxic Crystals and Stones List

FEBRUARY21,2016
REIKIANDCRYSTALHEALING

Toxic Crystal List
Some crystals may contain toxic of harmful ingredients. So please handle gently and remember to wash your hands after use. If you are creating a gem elixir, please be sure to use the indirect method.

Actinolite – May contain asbestos. Not recommended for elixirs
Adamite – Contains arsenic and some copper
Ajoite – Contains aluminum and copper
Alexandrite – Contains aluminum
Amazonite – Contains copper
Atacamite – Contains copper
Aquamarine – Contains aluminum
Auricalcite – Contains zinc and copper
Azurite – Contains copper
Beryl Group – These crystals contain aluminum
- **Bixbite**
- **Emerald**
- **Aquamarine**
- **Goshenite**
- **Heliodor**
- **Morganite**

Black Tourmaline – Contains aluminum
Boji-stones (aka Moqui Balls, Shaman Stone, Shamanic Star Stone) – Contains some sulphur,
- **Pyrite** and/or marcasite

Bronchantite – Contains copper
Cavansite – Contains copper
Celestite – Contains strontium
Chalcantite – Contains copper
Chalcopyrite (peacock stone) – Contains copper and sulphur
Chrysocolla – Contains copper
Cinnabar – Contains mercury
Conicalcite – Contains copper
Copper – Poisonous
Covellite – Contains copper and sulphur
Cuprite – Contains copper
Dioptase – Contains copper
Dumortierite – Contains aluminum
Emerald – Contains aluminum
Fluorite – Contains fluorine
Garnet (Spessartine, Almandine, Uvarovite, Rhodolite, Hessonite) – Contains aluminum
Gem Silica – Contains copper
Galena – Contains lead
Garnierite (aka Falcondoite) – Contains nickel

Hematite – Will rust, but not toxic
Iolite – Contains aluminum
Kunzite – Contains aluminum
Labradorite – Contains aluminum
Lapis Lazuli – Contains pyrite
Lepidolite – Contains aluminum
Magnetite – Will rust, but not toxic
Malachite – Contains copper
Markasite – Contains sulphur
Mohawkite – Contains copper and Arsenic
Moldavite – Contains aluminum oxide
Moonstone – Contains aluminum
Morganite – Contains aluminum
Pietersite – Fibrous form contains asbestos
Prehnite – Contains aluminum
Psiomelan – Contains barium
Pyrite – Contains sulphur
Realgar – Contains sulphur and arsenic
Ruby – Contains aluminum
Sapphire – Contains aluminum
Selenite – Although not toxic, friable; tiny shards may break o in water
Serpentine – Fibrous form contains asbestos
Smithsonite – May contain copper
Sodalite – Contains aluminum
Spinel – Contains aluminum
Spodumene (aka Kunzite) – Contains aluminum
Staurolite – Contains aluminum
Stibnite – Contains lead and antimony
Stilbite – Contains aluminum
Sugilite – Contains aluminum
Sulfur – Poisonous
Sunstone – Contains aluminum
Tanzanite –Gem variety of Zoisite. – Contains aluminum
Tiger Eye – Fibrous form contains asbestos
Topaz – Contains aluminum
Torbenite – Radioactive
Tourmaline – Contains aluminum
Tremolite – May contain asbestos
Turquoise – Contains copper and aluminum
Vanadinite – Contains vanadium
Variscite – Contains aluminum
Vesuvianite – Contains aluminum
Wavellite – Contains aluminum
Wulfenite – Contains lead and molybdenum
Zircon – Contains zirconium, radioactive
Zoisite – Contains aluminum

Radioactivity Concerns
Some forms of granite emit radon from the decay of Uranium. This is low risk.

Radioactive Gems. Artificially irradiated crystals, gems or stones may be radioactive. Try to steer clear of the following:

- Very deeply pigmented topaz
- Artificially dark (almost black) smokey quartz – not Morion Quartz
- Deeply colored crystals
- Colored diamonds
- Treated kunzite
- Cultured pearls

COMMUNITY SUPPORTERS

SOUTH HILL RV SALES Family Owned & Operated	South Hill RV Sales Offering the highest rated starter, midline, and high end towables and RV's at the lowest prices which has made us a top volume dealer in Washington state. 12414 Meridian East, Puyallup 98373 253-435-7751 or 866-435-7751 www.southhillrv.com
H & I Lapidary	Amber, Jewelry, Beads, Findings, Gemstones, Slabs, Rough Material, Fossils, and Aussie items. Mike and LaVon Siperek (253) 531-7294 4203 E 99th Street, Tacoma, WA 98446 Yankees_Diesel@comcast.net

FROM THE BENCH

This is going to be a 5-part series. If you wanted to print and tape them together, I bet they would look really good on the wall of your shop!

LAPS USED TO POLISH GEMS

Hardness 5 to 6. (Group Two Faceting for Amateurs)

Prepare surface on 1200 or 3000 lap, also Ultralaps

Polish laps: Tin/lead, tin, typemetal, Last Lap, Fast Lap, Pol-A-Gem cerium oxide, lucite (Plexiglas)

Agent; cerium oxide, alumina, tin oxide, others.

Speed; 100 to 200 rpm, sometimes slower.

Mineral examples; datolite, diopside, enstatite, natrolite, obsidian, opal, glass.

Synthetics; Fabulite, Linobate, Victoria stone, other soft synthetics.

Next month's segment: Hardness 6 to 7 ½, to be continued…

Local Area Shows for 2026

DATE & TIME	CLUB	SHOW	LOCATION
September 2026 19th 10am – 5pm 20th 10am – 4pm	Southern Washington Mineralogical Society	60th Annual show	Cowlitz Co. Fairgrounds Events Center 1900 7th Ave Longview, WA
September 2026 19th 10am – 4pm 20th 10am – 4pm	Fraser Valley Rock and Gem Club	Annual show	Aldergrove Kinsmen Community Center 26770 29th Ave Aldergrove, BC

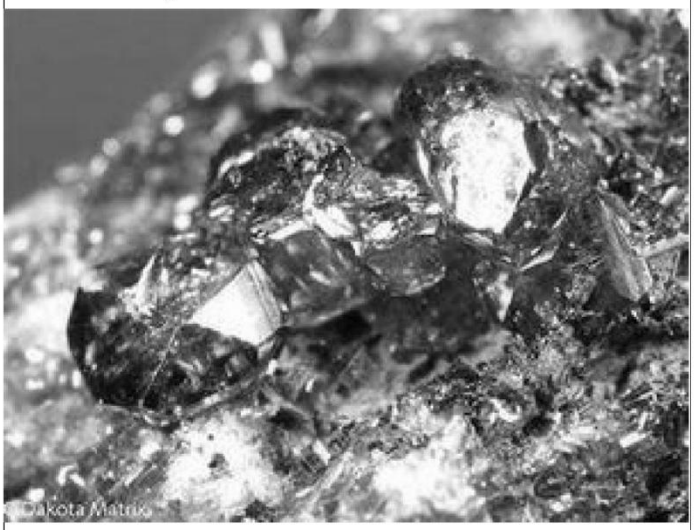
Chert embedded in chalk Photo: Leslie Ogg

From MSSC Bulletin, 05/26

This gorgeous mineral is a titanium dioxide metastable mineral. What does that mean? It means that these crystals form and are stable at all pressures and temperatures, but that these are usually just the starting point for something else to form, like rutile or brookite. The color of the stone depends on the growth of the crystal, the double pyramid growth producing the indigo to black with a steely luster, or the numerous pyramidal faced type that make a honey to brown color. The one pictured here has both types. These crystals will often form inside another material like quarts and some agates and can be found all over the world. Oh yeah…This is Anatase!



From PVGM Rock-A-Teer 05/26

What is this amazingly prismatic crystal? This is euclase a type of beryllium mineral and is related to beryl. The crystalline structure of Euclase is a monoclinic crystal system, meaning it has three vectors that grow at unequal lengths, making for some very unusual and not uniform shapes. Because of it's unique structure, it tends to be very brittle and can easily chip when worked which makes working it an experience for more seasoned veterans in the lapidary arts. Its color stays mainly in the blue range, but you can also find it in clear to light green.

(Continued on page 3)
